Supply Portal

Welcome to the IBM Global Procurement Supply Portal.
This site is a single entry point for suppliers to access all strategic IBM procurement applications.

- The Public Portal link to the left will lead you to a list of unrestricted procurement applications. **No action** is required to gain access to those applications.

- The My Portal link to the left will lead you to a **customized** list of procurement applications and user functions. After clicking on this link, you will be asked for a User Name and Password.
  - **First time users:** Register for your User Name and Password at the **IBM Registration** site. In the future, this will be your single indentity for accessing IBM systems over the internet. If you already have an IBM Registration User Name and Password, you do not have to obtain another.

- Once you have access to My Portal, the **User Functions** will allow you to complete administrative tasks, such as requesting access to a specific procurement application or changing your user profile.
